

## Architecture as...

Nick James Archer, Kari Lee McInnery-McRae, Simone Nelson, Siii Projects,  
Melbourne School of Design (MSD) students  
Curated by Sebastian Haeusler and Alex Walker

This exhibition explores the historical and affectual influence the Union House building has had upon those who enter it. Perhaps one of the last opportunities to encounter this strange architectural hybrid, *Architecture as...* is an interlinking tapestry of artwork, design and experiential passage through what it is, was and could be before the building is demolished forever. Featuring works by emerging artists, designs for future spaces by MSD students alongside historic plans reanimated with digital technology, this exhibition is *Architecture as...* an experience.
