

## Aesthetic Laboratory

Ace Wagstaff

22 April / 2 May

Within the 'aesthetic laboratory' more questions than answers arise. Although many separate objects stand alone they all seem to compose themselves into a greater order, a supreme hierarchy of natural design. Images, signs and objects tease the conscious mind with familiarity but elude connection to any known constant. An exploration for exploration's sake with a grounding replaced by a shaky pseudo.

**Opening night:** Wednesday 23 April 5-7pm
