## Summary

Above Quota Elections (AQE) were engaged to run the annual elections for the University of Melbourne Student Union (UMSU).

UMSU holds its annual elections in the first full academic week of September, which this year fell during the 4th-8th September.

A total of 278 nominations were received and accepted, and six tickets were registered. A handful of nominations were rejected or withdrawn. Nominations were again taken online; this year we also offered online ticket registration, and had an online portal allowing candidates and tickets to submit other forms, meaning that a candidate or ticket could be run without any paper at all. The move online also allowed us to produce a platform that showed ticket registrants the state of their ticket, including candidates' submission of forms, at a glance.

Polling was online through the BigPulse platform, which ran smoothly. During the week we ran six polling places (branded as "polling help points"): four at Parkville, and one each at Southbank and Burnley, each with an electronic voting device and a helpful staff member.

The Media Officers once again produced the Farrago election guide, which was made available online. While the Media Department opted not to do a print-run, we made a printed and QR-code version available at every help point.

The week mostly went smoothly, with all help points running at their scheduled times. Campaigning was strong despite many positions not being contested, or not being contested between tickets. The most pervasive conduct issue was campaigning to students while they were voting, with the first ban for this behaviour handed out at 10.20am on Monday. This, and the other notable incidents (including one which was referred to the Tribunal), are discussed in detail later.

As the ballot was counted electronically, we were able to show preliminary results to scrutineers on Friday evening, at around 5.45 pm , after closing all polling stations and dealing with the day's complaints and administrative matters. The provisional declaration of results was made on 13th September, other than the last four positions for Students Council General Representatives, which required the application of affirmative action; the compete provisional declaration of results was made on 22nd September.

The Clubs \& Societies Council, at which the Clubs \& Societies Committee election occurs, was held on Monday 9th October.

One matter was referred to the Electoral Tribunal, and remains under the Tribunal's consideration.

## Staffing

Stephen Luntz was appointed as Returning Officer and assisted by Patrick Clearwater and Jaimie Adam as Deputy Returning Officers.

Polling clerks were allocated from AQE's pool of experienced electoral staff. It is AQE policy for our staff working on university campuses to hold current Working With Children Checks.

UMSU's Electoral Tribunal was constituted by Michael Gronow KC, Peter Lithgow and Sarah Morgan.

## Election process

This year's election was the first to be run online while students were fully on campus. It was also the first online UMSU election for which AQE has been appointed Returning Officer. Some key differences to the past include:

- For the first time, we made it possible to perform all processes without printing or using paper, for those who chose it. This is discussed in some detail below.
- Similarly, we made it possible for ticket registrants to get an at-a-glance view of the state of their tickets, and which nominations they had consented to
- UMSU have substantially rewritten the Regulations since we were last engaged. This fixed many of the previous problems with them, although introduced some new ones.

## Timetable

The timetable was:

- Monday 24th July: formal notice of election, opening of nominations, and opening of ticket registrations
- 6 pm , Thursday 3rd August: prospective candidates' information session (held online); followed by an UMSU-organised information session
- 12 noon, Friday 11th August: deadline for nominations, deadline for ticket registrations
- 11.59pm, Monday 14th August: common deadline for other forms (declarations of eligibility, ticket order of candidates, candidate photographs)
- 2 pm , Thursday 17th August: draw for order of candidates and tickets (Returning Officer's Office)
- 5.30pm, Wednesday 30th August: information session and briefing for candidates and tickets, Saloon Bar, Clyde Hotel
- Monday 4th-Friday 8th September: polling week
- Wednesday 13th September: partial provisional declaration of results
- Friday 22nd September: full provisional declaration of results
- Monday 9th October: Clubs \& Societies (C\&S) Council, including C\&S Committee election

## Nominations

The nomination period ran from Monday 24th July (the first day of semester 2) through to noon on Friday 11th August. As required by the Regulations, this was also the deadline for policy statements and conflict of position forms.

A total of 284 nominations were received by the deadline (excluding nominations withdrawn before the deadline). Of these 257 were immediately accepted, and 27 were reserved for further checks. Of those reserved, six were eventually rejected while 21 were accepted. In the period between the close of nominations and the start of counting, seven candidates withdrew their nominations, meaning that 271 candidates ultimately contested the poll.

As an innovation this year, we sent each candidate a personalised, password-protected link to a website that allowed them to complete their conflict of positions form (if relevant), submit their declaration of eligibility forms (if required by R11.3) and review and update their policy statements and candidate photos. We continued to provide paper-based forms on the election website for those who preferred that mode. Generally no problems were reported from the web form, although it was not used by some of the largest tickets. We rate the experiment as a guarded success and would recommend an enhanced version in 2024, while continuing to provide traditional forms, accepted by email or in person, for those who prefer them.

The most common reason for rejecting nominations was failure to complete a mandatory form. This was relatively rare this year compared to prior years, which is pleasing because the Regulations now make rejection mandatory in a number of situations, and we attribute the low rate of rejection to, at least in part, our significant outreach to nominees before the deadline.

Ticket registration was also offered by online form this year, although only one ticket took advantage of it. The ticket registration deadline is the same as the nomination deadline, by which six applications for ticket registration were received, all of which were accepted.

As with individual nominees, ticket registrations were also sent an individual passwordprotected ticket link, which enabled them to update their policy statements, set the order of positions on the ballot and see candidates who had registered on their ticket. We regarded doing this as an important part of complying with Electoral Regulation 20.11. Use of the website for forms was mixed, with some tickets preferring to scan and email, but feedback regarding the online listing of received nominations was universally positive.

This year, we placed a focus on making clear information about the election process readily available to students and candidates, by:

- an updated and expanded website, including a document library,
- a dedicated candidate information page, and
- the Prospective Candidates' Information Forum.

The latter forum was organised for 3rd August, just over a week before nominations closed, and was held online as a recorded session, which was posted on the website. The forum primarily covered information about the election process. UMSU expressed a desire to include additional information, including a presentation from current Officebearers, about what the roles actually entailed. We felt it was most appropriate to keep the two presentations separate, so the latter was organised to run immediately after our forum.

The Media Office is responsible under the Electoral Regulations for producing the election guide issue of Farrago. We supplied them with the candidate statements and the submitted photos for this purpose. This year the Election Guide was produced as a separate publication rather than included in the relevant issue of Farrago. It was not produced as a printed publication but rather made available on the Farrago website. We printed a small number of copies to have on hand at the polling help points.

The week before the election we ran a Candidates' Information Session, where we asked representatives from each ticket and independent candidate to attend, so we could meet them and impress upon them the importance of following the conduct guidance in the Electoral Regulations. This was held in the Saloon Bar at the Clyde Hotel. Turnout was somewhat unsatisfactory and should be a focus for next year.

## Polling

Ballots were sent out to all students' University email accounts on the Monday of polling.
In the past (and in this year's UMSU International elections) we have observed slow delivery of emails from BigPulse to University email accounts. We worked with University IT to identify and remove the bottleneck. However, given the risk of slow delivery extending over several days, we scheduled the initial email to be sent at 4am on Monday (with a voting link that was not active until 10am). This precaution proved to be unnecessary, as the latest reported delivery was at around 5.15 am , and we were able to send two reminders with confidence that they would be received promptly.

These reminders were sent on Wednesday and Friday.

The Electoral Regulations require polling help points at a number of locations. One of these is an area "near Tram Stop 1" which, in practice, was likely to be Building 168 itself. The Tribunal agreed this polling place could be merged with the Building 168 polling place, resulting in a saving returned to UMSU.

The full polling place schedule was:

|  | Monday | Tuesday | Wednesday | Thursday | Friday |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Building 168 | 10am-5pm | $10 \mathrm{am}-$ <br> 6.30 pm | $10 \mathrm{am}-5 \mathrm{pm}$ | $10 \mathrm{am}-5 \mathrm{pm}$ | $10 \mathrm{am}-5 \mathrm{pm}$ |
| Baillieu <br> Library | noon-4pm | $11 \mathrm{am}-4 \mathrm{pm}$ | $11.30 \mathrm{am}-$ <br> 4.30 pm | noon-4pm | noon-4pm |
| FBE Building | 11am-3pm |  | $11 \mathrm{am}-3 \mathrm{pm}$ | 11am-3pm |  |
| Murrup Barak |  | $11.30 \mathrm{am}-$ <br> 2.30 pm | $11.30 \mathrm{am}-$ <br> 2.30 pm |  |  |
| Southbank <br> the Hub <br> Library |  | $11 \mathrm{am}-3 \mathrm{pm}$ | $11 \mathrm{am}-3 \mathrm{pm}$ | $11 \mathrm{am}-3 \mathrm{pm}$ |  |
| Burnley - <br> cafeteria |  | $1 \mathrm{pm}-4 \mathrm{pm}$ |  | noon-3pm |  |

Each polling place was staffed and had a device (tablet or laptop) that students could use to vote on. Given the prevalence of mobile smart devices (and the requirement to use one's smartphone to log in to University email) this latter facility was little-used, attracting only a handful of votes. More useful was the ability for students to ask questions of a real person, with the Baillieu Library polling place in particular attracting a number of inquiries. After noting on Monday that only the Baillieu polling place was attracting much interest, we extended the hours there from those initially advertised.

The week saw substantial campaigning from four tickets and some independent candidates. Generally behaviour was good, with the most prevalent issues relating to campaigning to voters while they were in the process of voting, which is prohibited. Policing this behaviour remains difficult, and represents a critical risk to the legitimacy of the election. We discuss this in the recommendations. Other incidents of prohibited behaviour are discussed below.

As part of our ballot integrity measures, where we identified that a vote had been cast under a situation of coercion, or otherwise not in compliance with the Regulations (through no fault of the voter) we offered the voter an opportunity to cancel their old vote and re-vote. Although we were careful to require some evidence from the voter (to avoid allowing revotes due to a change of mind), we were able to cancel votes even when we couldn't meet the standard of satisfaction to penalise a campaigner or ticket.

## Results

Polls closed at 5pm on 8th September. Overall, turnout was 4,917. This is about 9\% down from last year, most likely driven by having fewer contested positions and no University Council election this year.

Figure 1 shows the number of votes received during three-hour blocks over the election period.
The move to online voting has drastically reduced the number of students who complete the entire ballot: for example, for President (typically one of the most prominent positions, and historically first in the physical ballot pack), only $68 \%$ of voters submitted a non-blank vote. This is consistent with 2022 (at 69\%; also online) and much lower than 2020 (at 90\%; paper ballots used). A similar trend can be seen throughout the ballot pack.

Scrutineers were invited to observe the release of votes shortly after 5pm on the Friday of election week. At that time we provided results for all single-member positions and first preferences for all multi-member positions, but we reserved the latter for further counting to ensure that both UMSU's electoral rules, and the affirmative action requirements, were implemented correctly.

The provisional declaration of results for positions other than general representatives on Students' Council was made on 13th September, and the provisional declaration for the general representatives on Students' Council was made on 22nd September.

Figure 1: Number of votes cast, in three hour blocks

## Complaints and issues

Given the sheer number of students participating in campaigning, it is not surprising that a significant number of complaints were received. Of the tickets and independents campaigning, none provoked complaints that were vastly out of proportion to their size.

## Campaigning to students while voting

As we said in the report relating to the UMSU International election, in an online election, every student carries a walking polling place. This concern is not theoretical or illusory: to ask a student to take their phone out and "vote for me" is easy to do (and, as a campaign tactic, extremely effective!), but absolutely prohibited.

Tickets and independent candidates were warned about this conduct repeatedly: through our communications with them, on the election website, in the Electoral Regulations, during the Candidate Information Session, through the bulk of Ruling (1) of the Returning Officer and one-on-one to ticket registrants and campaigners. Conduct of this type provoked a campaign ban at 10.20am on Monday, and bans continued regularly throughout the week. Our view is that the incidence of this conduct was higher than in the UMSU International election - partly due to higher levels of campaigning, but this is also suggestive the behaviour is becoming normalised.

Despite this, the Returning Officer is aware that the conduct was pervasive during the week, no doubt due to its effectiveness. Fortifying this conclusion is the complaints that were received about voters being coerced into, or placed under pressure, to vote for someone just to get away from a campaigner. It is virtually certain the complaints we received represent only a fraction of the overall incidence, and we regard it as representing a significant threat to the integrity of the process.

## Other conduct issues

Other significant conduct issues included:

- Non-students campaigning - Complaints were received about non-students campaigning. In a worrying number of cases, these complaints were substantiated, resulting in significant bans for the tickets concerned. In some cases a reasonable case was made that the campaigner believed they were eligible (e.g. because they were on a deferred course or had been enrolled during Semester One), resulting in an amelioration in penalty, but any leniency was very limited as all eligible campaigners should have received voting links and no proactive complaints were received from them about the lack of such links. In the recommendations, we discuss the need for the Regulations to contain a clear statement about who is a student.
- Assaults - Two complaints of assault were made. Although the alleged actions were low on the scale of objective seriousness, the Returning Officer takes a hard line on assault in all cases, particularly when physical contact is involved. One complaint (less serious) was admitted by the assailant and attracted a significant penalty for both the candidate and ticket concerned. The other was strenuously denied, and was referred to the Electoral Tribunal, which currently has carriage of the matter.
- Abuse and vilification - Several tickets alleged abuse from other campaigners that went far beyond the norm, including racial vilification and comments about sexual interests. All of these were denied. Our campaign staff did not witness any of these, and without independent witnesses we could not confirm them. Nevertheless, the highly specific nature of some of these complaints make us suspect there may be some substance to them.
- Authorised material - As always there were a few complaints around incorrectly authorised, or non-authorised, material. This year although there were several incidents, none rated very seriously as all material was clear as to its provenance.

## Clubs \& Societies Committee

The Clubs \& Societies Committee is elected at the Clubs \& Societies Council, which this year took place at 2 pm on Monday 9th October in the Turner Theatre of the Biosciences 2 building, on the Parkville campus.

As required by the Clubs \& Societies Regulations, the Council meets to receive reports and other matters from the Clubs \& Societies Department, and nominations and polling for the election take place during the meeting. As set out in the Regulations, clubs are represented by their President, or a delegate nominated by the club prior to the meeting. The Clubs \& Societies Office handled notice of the meeting and gathering the delegation forms.

A total of nine nominations were received. We arranged for the ballot draw and printing of ballots to take place while candidates were speaking and answering questions.

After the conclusion of speeches, we issued ballot papers to all eligible members of the Council. (As has been practice in the past, early voting was permitted for members who had to leave early, as long as they had listened to each candidate's opening speech.)

One difficulty that arose was in timing: the room was booked for a lecture immediately after the Council, meaning we had to move quite quickly to seal the ballot box before it was moved to the count venue. This, and other difficulties with the room, are discussed with recommendations below.

The votes were counted without difficulty in Building 168 and the declaration of results was made the next day, on 10th October. The C\&S Office emailed it out to all clubs and posted it on the website and noticeboards.

## Recommendations

## Consider a return to in-person voting

The most significant issue in this election from a probity perspective was campaigners either violating the secrecy of the ballot by watching a student vote, or the closely-related issue of effectively coercing a student to vote by campaigning to them in the act of voting. Bans for this category of prohibited conduct were common and occurred throughout the week. Despite this, the behaviour continued. Moreover, when caught, campaigners repeatedly pled ignorance of the rules, claiming to not understand how their actions were in breach.

Some of this confusion was undoubtedly feigned, but the circumstances do place campaigners in a difficult situation. For example, we witnessed cases of voters asking campaigners for assistance because they were unsure about the process of voting, and were not aware of neutral staff who could help, or simply were in too much of a hurry to not go with the person closest to hand. There are also difficulties in systematically enforcing rules against coercion: while the behaviour is usually easy to detect when an election official is present, it is impossible to monitor all campaigners simultaneously. Similarly, access to closed-circuit television (CCTV) surveillance footage is dependent on University goodwill, and their interpretation of their privacy policy, rather than something contractually guaranteed to the Returning Officer, and therefore cannot be relied upon. Reports from coerced voters are also helpful, but it is likely most students on the receiving end of such tactics want to have nothing more to do with the election (or UMSU generally).

In this election, with the margins for most positions so overwhelming, this problem was manageable. This will probably not be the case in future when elections are closer. Online voting was scrapped in 2006 for several reasons, one of which is that it provides so many opportunities for intimidation, harassment and even bribery of voters. Now that students can vote on their phones, as well as just on laptops, the dangers are considerably greater.

Online voting does provide a number of advantages. However, it should be possible to combine at least some of these with the benefits of paper voting. One option would be to make an online vote available for those who cannot make it onto campus during the week. This would be quicker and more accessible than the old postal votes, but would still largely avoid the risk to the secrecy of the ballot.

A second option, whose technical viability would need to be explored, would be to keep the ballot online, but prevent voting from mobile devices within the University campus. Students would still be able to vote online from home, or to attend designated polling stations, where they would be protected from pressure while they voted.

We recognise that at the moment the need for such a change may not seem to justify the effort. However, the student union has been brought down before through loopholes in the electoral system that allowed a perversion of democracy, which initiated a chain of disastrous outcomes and the syphoning off of millions of dollars of student money. Online voting carries within it a heightened danger of this happening again, and the time to address it is when there is not a team in the election seeking to go down that path, rather than when they have already established their presence.

## Review the definition of "student"

The definition of "student" is of central importance to the election, because it defines who is eligible to run and to vote. Unfortunately the definition given in the Constitution (to which the Electoral Regulations refer) is not precise, and therefore creates some gaps that the Returning Officer must fill with Electoral Tribunal decisions and their own judgement.

The Constitution defines "Student" by reference to the University of Melbourne Act 2009 (Vic). This definition is somewhat unhelpful because, as well as encompassing students enrolled in higher education award courses, also gives wide latitude to the University Council to define "student" broadly. Separately, in C2.1 and C2.6(a)(i)(A) the Constitution uses a (perhaps more restrictive) term relating to students in "higher education award course[s]" at the University.

In practice, the definition the Returning Officer uses for the election is students enrolled in a higher education award course in semester 2 of the relevant year, as this is what the University uses when they provide us with a roll. This excludes students on a leave of absence and, in most cases, students doing study that doesn't lead to a higher education award from the University (for example, some exchange students, Community Access Program students, high-school Extension Programme [UMEP] students, and dual-enrolled students whose primary enrolment is with another institution).

We recommend this definition be clearly incorporated into the Constitution and Electoral Regulations. We view this as a matter of some risk as if the existing definition were to be challenged and that challenge upheld by the Tribunal during election week, the election process would face significant vulnerability.

The Returning Officer takes no view on whether a wider or narrower electorate is desirable, but recommends consideration of which students the University funds UMSU to represent and the willingness of the University to produce a roll, along with any other factors UMSU sees relevant.

## Bulk emails

Some campaigns sent bulk emails to student email addresses. This appears to violate University policy, but not the UMSU Electoral Regulations.

Some risks we have identified around this include:

- That the behaviour is not prohibited by UMSU Electoral Regulations may lead to some campaigners facing sanctions from the University, with consequences for their enrolment which may not be as well-targeted as a penalty determined by the Returning Officer
- There is a reputational risk that, even if the email list is obtained legitimately, students receiving it may perceive that their privacy has been violated and that UMSU is responsible for providing the list
- Bulk emailing activity in breach of University rules may cause a deterioration in the relationship between UMSU and the University
- Many bulk emails complained about this year fall well short of industry standards by not obtaining consent from recipients, failing to include a clear privacy disclosure notice, and not having a working opt-out facility

For this reason we recommend that significant attention be paid to how the Regulations treat bulk emailing activity by campaigners.

## Technical changes to the Regulations

There are a number of smaller changes we recommend to the Regulations that are grouped in this section. Despite being small, we regard the first four as high-priority changes.

- Introduce a default order in case of conflict: Regulation 8.3 deals with conflict of positions: where someone is elected to more positions than can be simultaneously held. It does so in an extremely harsh way: the conflict form must come by close of nominations, and if not supplied, the Returning Officer is obliged to reject all nominations (arguably including those unrelated to the conflict). This year significant effort was spent impressing on nominees the importance of this form, and despite this some nominations were still ruled out. We suggest two changes:
- Replace "at the time of nomination" with "by a deadline set by the Returning Officer"
- Replace the last sentence with "If such a list is not provided, the person is deemed to prefer Officer positions in the order listed in R4.2, and then other positions in the order listed in R4, to the extent of the conflict." Something along these lines is used for both GSA and UMSU International elections, and while not foolproof, improves the situation.
- Allow the nomination status to be shared with a ticket's registering officer: We recommend the last sentence of Regulation 12.3 be amended to exclude its operation "to either a nominee personally or, if the nominee is running on a ticket, that ticket's registrant". In practice the fact of nomination must be known to the registrant (as R20.11 obliges them to countersign the form), and it significantly reduces the administrative burden if the Returning Officer can communicate whether a nomination is accepted with ticket registrants.
- Policy statements: We recommend Regulation 13.1 be updated to change the deadline from close of nominations to one set by the Returning Officer. In practice this will always need to be close to the nomination deadline due to the need to produce the Election Guide, but allowing the Returning officer to set a later deadline will reduce the urgency of statement-related queries at a time when the RO is dealing with last-minute nominations.
- Similarly, we recommend Regulation 13.2 be updated to read "Ticket Registrants or independent candidates" (new words underlined) to reduce the already-significant advantage tickets have over independent candidates.
- Regulation 6.4: Electoral Regulation 6.4 prevents a student, who has been terminated from their position, from standing for election "within the academic year that the termination occurred". As the Regulations deal with both annual and byelections, it is not completely obvious whether the academic year is the year the student is standing, or the year they take up the position. (Further adding to the ambiguity, the UMSU term of office is no longer perfectly aligned to the academic year.) Given the punitive nature of this provision, we recommend it be made absolutely clear, either by writing "stand for election to a position they would take up in the academic year that the termination occurred" or "stand for election, where the election takes place in the academic year that the termination occurred".
- Address issues of misnumbering, outdated references and internal contradiction.

The Electoral Regulations still contain references to Union House, which is now closed. The Electoral Tribunal ruled that these can be taken as references to Building 168. However, as long as the references remain unchanged, the potential for confusion remains.
Similarly, regulation 27.10 says "Polling Places named in R27.(b) R27(c). R27(d). R27(e) and R27(f) must be open for at least two days for an annual election."
However, it then says (c), "For an annual election, polling at the Polling Places named in 27.9 and $27.9 e$ ) many not be restricted to less than three days.

The Electoral Tribunal ruled that the reference to 27.9 was intended to be 27.9(d) and that therefore 27.9(b) could be open for just two days. Nevertheless, as long as matters like this remain there is potential for challenges. At both Burnley and Murrup Barak we were
advised, and found, that the spaces where the polling help desks were established would only have much use on the Tuesday of election week. Other days turned out to be superfluous. When polling is on paper, it may make sense to run these locations over two days, but when there is little demand for the help desks at the best of times, it is a waste of UMSU's money to have them operate on days when few students were even using the spaces.

## Recommendations relating to the C\&S Committee Election

- C\&S Regulation 2.1(b)(iii) only allows someone other than the President of a club to represent that club at Clubs Council if the President is representing another club, not if the President is unable to attend for other reasons. We believe this is not the intent of the regulation, and creates many practical problems and should be changed.
- C\&S Regulation 2.1(b)(1) requires clubs to nominate a voting representative prior to the Clubs and Societies Council. Many clubs forget to do this, but a representative attends anyway. Under the current rules, if that is not the president, they are unable to vote. Unlike the other issues we highlight here, this one does have some merit. However, it also prevents a few clubs each year from being represented. Consequently, we recommend there be consideration of changing it.
- When casual vacancies arise over the summer break for people not elected on tickets it is effectively impossible to fill them until term starts again, since unsuccessful candidates must be given five Academic Days to reply as to whether they will take up the position if they are successful. For C\&S in particular, where no one is elected on a ticket, this can leave the committee with multiple vacancies at a time when it badly needs to meet. Therefore, we recommend in 18.3(b) of the UMSU Election Regulations, change "Academic Days" to "Business Days", or provide an amendment specifically for Clubs and Societies Committee.
- C\&S Regulation 2.1(b) says "Each Club Committee shall nominate a voting representative to attend council. The use of "shall", rather than "may" implies that it is compulsory. This has never been enforced, and probably was not intended to be. It's unlikely this will matter, but if the intention is not to force every club to send a delegate then the wording should be changed to "may".
- In the C\&S Regulations, Section 4(e) of Appendix 2 only allows candidates to act as scrutineers. This is contrary to common practice, where candidates cannot act as scrutineers but can appoint others to scrutineer for them. In this case we would suggest the problem is usually too few scrutineers, rather than too many, and we recommend
allowing as much opportunity as possible - that is candidates can either attend as scrutineers, or appoint others in their stead.
- There are two activities that take place during Clubs Council: first, a meeting of a large body of people, and second, an election. These impose quite different needs on the room chosen for the meeting and its layout. Greater attention needs to be placed on the room requirements for the election. In particular, we recommend that future Councils be held in a room that has at least two tables for election activities (sign-in; ballot issue and ballot receipt), and enough space and flat, hard surfaces to allow voter to vote in private (ideally, space to erect privacy screens). This year we also had to leave the room immediately after the meeting closed for a following lecture, which meant sealing the ballot box had to be done in a hallway. We recommend the room be booked for an additional hour. In saying that, we acknowledge that finding such a room is challenging at the best of times, and is even more difficult during semester time.

## Declaration

I declare that the 2023 University of Melbourne Student Union annual elections were conducted and administered with impartiality by myself and the directors and staff of Above Quota Elections Pty Ltd

Stephen Luntz
Returning Officer

## Acknowledgements

The UMSU elections are always a complex undertaking and there are a number of people who deserve our thanks for making it a success.

From UMSU, a special thanks to Ciara Griffiths, Ailish Hallinan, Tim Lippis, Sara Pheasant, Fiona Sanders, the Info Desk team and CME; and the Farrago editors (Josh, Weiting, and Xiaole) for production of the Election Guide.

From the University, the Security team, staff in the Safer Community programme, and the University Secretary's department, for assistance with security issues and specifically James Holloway and Sean Goegan for help with the roll, including lightning-fast responses to our many individual student number checks.

Finally, thanks to the candidates, campaigners and voters for participating; particularly we wish the elected team best of luck in the coming year.

## Appendix: Provisional list of nominations (ballot order)

Below is a provisional list of nominations.
Candidates are listed in the order they will appear on the ballot. The draw for order was held at 2pm on Thursday 17th August.

Please draw any errors to our attention, and also check the spelling of your name.

## Officebearers

President

| Disha Zutshi | Community for UMSU |  |
| :--- | :--- | :--- |
| Patrick Irwin | Rebuild our UMSU |  |
| Jiayuan Guo |  |  |
| Reza Khosravi |  |  |

## General Secretary

| Nishant Sahoo |  |  |
| :--- | :--- | :--- |
| Enzhe (Kevin) Li | Community for UMSU |  |

## Education (Academic Affairs) Officer

| Aiden Augustine |  | Nomination rejected |

Stephen Luntz
Returning Officer
Above Quota Elections Pty Ltd
returningofficer@union.unimelb.edu.au

8am, 4th September 2023

## Appendix: Full provisional declaration of results

Counting, and all verification checks, are now complete.
In accordance with Electoral Regulation 47.1, a candidate may request a recount within three academic days of the provisional declaration for their position. Such requests should be directed to the Returning Officer. In accordance with Electoral Regulation 47.2, a student may appeal against the result of the election within three academic days of the provisional declaration for a position (or of a recount for that position). Appeals should be written submissions directed at the Electoral Tribunal (and a copy sent to the Returning Officer).

The Returning Officer notes that this provisional declaration is on the basis of votes cast at the election, and that some complaints are still outstanding and may result in a referral to the Electoral Tribunal.

Note that the body of this provisional declaration provides only primary votes. Countsheets are attached as appendices.

\section*{Stephen Luntz}

Returning Officer
Above Quota Elections
22nd September 2023

\section*{Appendix: Rulings}

This year there were two formal written rulings by the Returning Officer, both of which are reproduced below.

The Standing Rulings reproduce from certain rulings from previous years that are still relevant. Ruling (1) related to a number of smaller conduct issues, and mainly served to provide absolute clarity around the Returning Officer's approach to certain types of prohibited conduct.

\section*{Standing rulings from previous years}

We regard the following as standing rulings, although some have been updated slightly from their original form for clarity and to reflect changes to the Regulations.

Posters on bollards - ruling (3) of 2008
1. Tickets have previously been advised to share poster space on bollards and not to cover the posters of other tickets when there was free space available, nor to blanket bollards with their own posters leaving little or no free space.
2. Unfortunately this advice has not been consistently followed, leading to unnecessary waste of resources and tension between campaigners. This is of particular concern given the evident policy concern of the Regulations to conserve paper.
3. Therefore, effective immediately and for the remainder of the campaign, a limit of six A3size posters (or 12 A4-size) per ticket (or independent candidate) on any one bollard at any time is hereby imposed, by virtue of the Returning Officer's power under Reg. 26.6 to control space allocation.
4. Campaigners are also reminded that pulling down posters belonging to another ticket is prohibited conduct under Reg. 44.5(l), regardless of whether or not they are within the scope of this Ruling, and that the proper remedy for any alleged breach of this or any other Ruling or Regulation is to make a report to the Returning Officer.

Photos and logos - ruling (3) of 2011
Identifying photos of candidates or other students may only be used in election material if they have already been placed in the public domain by the student concerned or if the written consent of the student has been obtained. This consent must be provided to the Returning Officer on request.

Logos or endorsements from another group or organisation (including UMSU-affiliated clubs) may not be used without the written consent of that organisation. This consent must be provided to the Returning Officer on request.

\section*{Ruling ( 1 ) of the Returning Officer}

This ruling relates to matters of authorised election material, prohibited conduct and related matters.

\section*{Shorter matters}
1. Electoral Regulation 26.3(b) prohibits material reproduced on paper larger than A3. For the avoidance of doubt, the Returning Officer regards material produced on multiple A3 (or smaller) sheets that are combined to form a single item larger than A3 as being prohibited by this regulation, in order for it to have effect. If the Returning Officer is wrong, then such material is banned pursuant to Regulation 26.6 as of 7 am Tuesday.
2. Poster paste/wheatpaste is banned except on bollards specifically set aside for postering. This ban extends to any other method of adhesion that damages the surface where the poster is placed (Regulation 44.5[s]). Damage to surfaces will be treated as a significant aggravating factor in dealing with cases where posters are placed in prohibited locations.
3. Electoral Regulation \(44.5(n)\) bans interference with another candidate's publicity. Once a voter has a leaflet in their hand, it's theirs, and you can't take it from them (even if they offer it to you). As a general rule, we strongly discourage candidates touching other candidates' pamphlets.

\section*{Campaigning and phones}
4. A difficulty in an online election where students can vote using their devices is the ease with which a campaigner can, intentionally or inadvertently, violate the secrecy of a vote. A related concern is that a voter voting in the presence of a candidate can and often does have a coercive effect: if a student feels the easiest, or only, way out of an interaction with a campaigner is to vote for them, then that vote is not fairly got. This is true even if a campaigner doesn't intend to create a coercive environment. All candidates and tickets
are reminded of Regulation \(44.5(\mathrm{~h})\), relating to violating the secrecy of the ballot and Regulation 44.5(q), relating to undue influence..
5. For the avoidance of doubt, the following are prohibited by the Regulations:
1. Taking, with or without permission, the phone of a student to assist them in voting.
2. Viewing the screen of a voter in the act of casting a vote, including viewing the email from the Returning Officer containing their voting link.
3. Being in the vicinity of a voter when voting (including retrieving the voting link and accessing the BigPulse site), or when a campaigner has reason to believe the voter is voting. This is true even if the campaigner cannot see the voter's screen, because of the perception of undue influence, and because no effective control is in place to ensure ballot secrecy.
6. We are concerned particularly with the last point above: many campaigners received bans on Monday because our staff observed them chatting to voters who were clearly in the process of voting.
7. By analogy to a paper ballot: you can walk the voter to the line (i.e. tell them how you'd like them to vote and what steps to take) but once they cross the line (i.e. open their phone to begin voting), you have to step back and disengage. Campaigners cannot be in the vicinity of voters who are voting, and if a student (having been told how to vote) takes out their phone, campaigners should draw the inference that they are beginning their vote.
8. We appreciate this makes campaigning more difficult: you can't win a vote there and then, you have to trust that you have been convincing enough the student will subsequently vote for you. However our view is that it is the only way we can comply with the Regulations, and we regard a voter's right to vote privately as outweighing the other considerations.
9. All candidates are reminded that there are Polling Help Points available throughout the week to assist voters who have difficulty operating the system.
